Friday, April 8th, 2022

Dr. Kate Maki

“Febrile Neonates: Clinical Approach and Evidence Review”

Talk Objectives:

- ♦ Define serious and invasive bacterial infections (SBIs & IBIS) in neonates
- ♦ Discuss the history/changes to clinical approaches to SBI/IBIs
- ♦ Review the 2021 AAP guidelines
- ♦ Review algorithmic approaches to fever in different neonatal age groups
 - 8-21 days
 - 22-28 days
 - 29-60 days
- ♦ Review some hot topics and key take-aways from recent papers

Sponsors:

Langley Memorial Hospital Physician Association, through the Facility Engagement Initiative funding.
